### **William M. Bird & Company, Inc.**

"I ordered a demo Barracuda with some hesitancy. It just sounded too good to be true: a spam appliance that did virus scanning, DNSBL filtering, Bayes filtering, whitelisting, and blacklisting, required very little setup and no maintenance, and was completely transparent to mail delivery. And you get all this with no per-user charges. Given what your competition charges for less functionality I hope you can forgive my trepidation... The invoice came in for the Barracuda and I gladly signed off on it. I would have paid twice as much and still thought I was getting a deal. My only complaint is I wish I had found your product sooner."
